Rue des Morins 15,
1040 Brussels,
Belgium.

MY WEB DEVELOPMENT EDUCATION HISTORY.

FRONT-END WEB DEVELOPMENT

Cepegre Brussels / Nov. 2021 - May 2022

- **production of newsletters:** creation of compatible newsletters for the different mailboxes.
- **production of websites:** creation of responsive websites respecting the separation of content, the cutting of models, the design and the layout of graphic elements, I respect the integration of pages according to web standards by validating it on the W3C validator, optimizing accessibility, be attentive to referencing and compatibility on different browsers and platforms (mobile first).
- **Sass/Scss:** using SCSS in Sass, flexboxes & grids for layouts, JS and jQuery to trigger and create animations.
- **JavaScript + libraries (jQuery/ReactJS):** DOM manipulation: reacting to events (click, scroll, mouse over, responsive menus, CSS animations, modal windows, SVG's animation, `appendChild`).
- **HTTP request:** Using the `ajax()` method to perform AJAX asynchronous HTTP request.
- **React JS:** Basic knowledge of React JS after self-training in e-learning such as installing and using React app, creating components and functional components, using ES6, JSX, using states to display dynamic data, embed Bootstrap, font awesome.
- **Design:** Using software like Affinity Designer and Photo, I also use Figma for SVG animations.
- **Wordpress:** Creating custom Wordpress theme from a static site made in HTML/CSS/JS converted to Wordpress PHP using resources like ACF to create custom fields, Hasty to create custom post types and using the Wordpress plugins.
- **Workflow:** using Github to create repositories, branches, commits, and pull requests, using Gulp to automate tasks like minification in the development workflow.
